

PRABHAV JAIN

AGENTIC AI ENGINEER

Bengaluru — aadimate2004@gmail.com — +917898575626 — [LinkedIn](#) — [GitHub](#)

SUMMARY

AI engineer with hands-on experience shipping multi-agent systems and RAG pipelines in production. Built and deployed an AI Ops platform at AegisOps and currently leading the AI agent layer for a university training platform serving 8,000+ users. Comfortable owning full agent lifecycles — from architecture decisions to debugging failures in prod.

SKILLS

- **Languages:** Python (asyncio, pytest), JavaScript
- **AI & Agents:** LangGraph, LangChain, OpenAI API, Gemini, Ollama, RAG Pipelines, Tool Calling, Human-in-the-Loop, Mem0, LangGraph Checkpointers
- **Databases & Vector Stores:** PostgreSQL, pgvector, ChromaDB, FAISS, Pinecone, Redis, Supabase
- **Observability & Reliability:** Langfuse, LangSmith, LLM-as-Judge, Retry Logic, Guardrails, Timeout Handling, Failure Recovery
- **Backend & Infra:** FastAPI, NestJS, Node.js, Flask, Docker, GCP, Vercel, BullMQ, n8n, REST APIs
- **Frontend:** React, Next.js, Tailwind CSS

PROFESSIONAL EXPERIENCE

Agentic AI Engineer Intern — AegisOps Techlabs Pvt Ltd *Nov 2025 – Apr 2026*

- Built and shipped a multi-agent AI Ops system end-to-end using LangGraph — designed agent architecture, wrote the FastAPI backend with SSE for real-time streaming, and handled deployment
- Built production RAG pipelines with pgvector and OpenAI embeddings; designed a multi-tier memory system (session state, working memory, long-term context) so agents maintained reasoning continuity across long runs
- Instrumented the system with Langfuse and OpenMeter; added guardrails, retry logic, and timeout handling to keep agents stable under production load

AI Engineer — TapNex (NexGen FC) — Co-founder *Jul 2025 – Nov 2025*

- Designed and shipped 4 platforms (ticketing, registration, hostel meals, gaming café) for live events as the sole engineer; integrated Razorpay and Cashfree, cutting manual processing overhead by 70%
- Led campus community building as Club Lead at Cognito Club (Jain University) and Fellow at Under 25; held ambassador roles at GeeksforGeeks and BlackBox AI

CLIENT PROJECTS

AI Training & Placement Platform — AI Engineer

- Designed and built the full AI agent layer for an institution-grade platform targeting 8,000+ concurrent users — 8 specialized agents including a Syllabus Parser, Learning Path Generator, Resume Analyzer, Risk Detection System, and a Natural Language Query Router that dispatches to 3+ downstream agents
- Built evaluation workflows across all agents using LLM-as-Judge scoring and task success rate tracking; integrated Langfuse for end-to-end observability; Risk Detection System triggers alerts within 5 minutes of threshold breach with full audit logging
- Contributed ~50% of the NestJS backend (PostgreSQL, Redis, BullMQ) alongside full ownership of the agent layer

Land Data Intelligence Platform — AI & Automation Engineer

- Built Python automation pipelines for notification dispatch, data fetching, and document parsing; designed webhook-triggered workflows for real-time event handling across platform modules

PERSONAL PROJECTS

Autonomous Research Agent [GitHub Link](#)

- Supervisor agent coordinates specialized workers via state machine transitions and interrupt handling; workers use ReAct reasoning loops with dynamic tool calling to do multi-step retrieval and produce structured output

AI Interviewer System [GitHub Link](#)

- Stateful LangGraph workflow with session memory — agent pauses for user input, evaluates responses in context, and generates a structured report with scores, gap analysis, and improvement suggestions from uploaded resume and JD

EDUCATION

B.Tech CSE (AI & ML) — Expected Graduation: May 2027

Jain Deemed-to-be University, Bengaluru — CGPA: 7.32/10
